

YASH CHOUREY

GRAPHIC DESIGNER • UI DESIGNER (SELF-TAUGHT)

9575371109 | yashchourey56@gmail.com | Bhopal, India

PROFESSIONAL SUMMARY

Graphic Designer with a year of client-facing experience at DigiRank360, working on social media campaigns, promotional creatives, and branded visual assets for jewellery, education, and digital business clients. Outside client work, I've been teaching myself UI design in Figma — building mobile and web interface concepts to get hands-on with wireframing, prototyping, user flows, and responsive layouts. Comfortable taking client feedback and turning it into real design changes, and looking to eventually bring my UI skills into paid, professional work.

EXPERIENCE

Graphic Designer — DigiRank360 | 1 Year – Present

- Designed social media posts and promotional creatives for jewellery, education, and digital business clients using Adobe Photoshop and Illustrator, lifting post engagement by around 18% on campaigns I redesigned.
- Kept visual style consistent across 12 client projects by sticking closely to each brand's typography, color, and layout guidelines.
- Cut client revision rounds roughly in half — from about 4 rounds down to 2 — by getting clearer feedback earlier in the design process.
- Juggled 8-10 client projects at a time without missing deadlines, while keeping every deliverable on-brand.

Graphic Designer — Previous Experience — Media House

- Sped up creative turnaround by roughly 12% by building quick, rough concepts first instead of jumping straight to polished visuals, which cut down back-and-forth with the team.

CLIENT GRAPHIC DESIGN WORK

- D2C Consumer Brand: Built out product visuals and social creatives, keeping layouts consistent across the whole campaign.

UI DESIGN PRACTICE (SELF-TAUGHT, PERSONAL PROJECTS)

Not client-commissioned — these are independent projects I built on my own to get better at UI/product design in Figma.

- E-commerce Mobile UI Concept: A multi-screen shopping app design, mainly focused on getting the navigation and information hierarchy right.
- Grocery Delivery Mobile UI Concept: A grocery-app interface with a clear category structure and layouts that hold up across screen sizes.

SKILLS

Client-facing: Graphic Design, Social Media Design, Typography & Layout, Visual Hierarchy, Brand & Campaign Creatives, Client Feedback & Iteration, Time Management

Self-taught (personal projects): UI Design, Digital Product Design, Wireframing, Prototyping, Mobile UI Design, Responsive Design, User Flows, Information Architecture

TOOLS

Figma, Adobe Creative Suite (Photoshop, Illustrator, Premiere Pro), CapCut Pro, AI-Assisted Creative Tools

EDUCATION

Diploma in Computer Science — Technical Foundation

Diploma in Graphic Design & Video Editing — Design Training

10th, MP Board — 2021

ACHIEVEMENTS

- Completed 1 year of client-facing graphic design work at a digital media company, delivering branded visual assets across multiple industries.
- Self-taught UI design through independent Figma practice projects, building a foundation in wireframing, prototyping, and mobile interface design.

PROFESSIONAL STRENGTHS

Clean and purposeful visual communication. Strong attention to alignment, spacing, and typography. Punctual and deadline-conscious. Open to feedback and iterative improvement. Self-learned through practical projects and continuous learning.
